Backplane for 4x 2.5" SATA/SAS HDD/SSD

For small drives

A backplane solution for the smaller 2.5" HDDs. Up to four HDDs with a maximum height of 15 mm can be accommodated here.

An elaborated system

In order to prevent the hard HDDs from getting too warm during operation, the aluminium housing ensures a certain stability as well as good heat dissipation. The 2x 40x40 mm fans cool down the backplane perfectly.

Fast and safe

The Back Plane supports SAS and SATA HDDs and therefore high transfer rates. The existing locks protect the HDDs from unauthorized access.
