Our fastest!

With the new technology of USB 3.1, even greater data transfer rates are now achieved. Also USB 3.1 is downwards compatible, with the corresponding cables. The high data rate of up to 10 Gbit/s is supported by the included USB 3.1 Type-C™ cable and only needs a suitable end piece in the form of a PC, tablet or the like.

Stay cool

Thanks to its excellent heat dissipation, the aluminum ensures cool operation of the HDD/SSD. So this enclosure doesn't need a fan and it always remains quiet as a whisper.

The height is crucial

Hard disks and SSDs with a height of up to 9.5 mm can be accommodated in the housing. This case is especially suitable for SSDs because they can work even faster than conventional HDDs. An LED indicates operation and access to the hard disk.
